Art Unit: 2834

## **DETAILED ACTION**

## Allowable Subject Matter

1. Claims 1-4 are allowed.

2. The following is an examiner's statement of reasons for allowance.

DeBiasi et al. disclose the construction of a control device for a vehicular AC generator, comprising:

batteries, each of which is charged with electric charges on the basis of an output of generation of electrical energy of an A.C. generator having a field coil;

voltage regulating means for regulating a current, which is caused to flow through said field coil, on the basis of the detection result of a voltage developed across the terminals of said batteries due to an output voltage of said A. C. generator into an fixed output value of the generation of electrical energy of said A. C. generator; and

field current restricting means for detecting a current, which is caused to flow through said field coil by means of a field current detecting resistor to restrict the current to a predetermined value in correspondence to the detection result.

Morris teach the construction of a resistor assembly and an insulating board for fan controller for the purpose of providing an improved resistor assembly incorporating an anodizable metal substrate having an anodized insulating coating and one or more printed resistors screen printed directly on the insulating coating.

The prior art of record, taken alone or in combination, fails to teach the construction of a controller for an A.C. generator for a vehicle as described on independent claim 1, comprising a

Art Unit: 2834

field current restricting means for detecting a current which is caused to flow through said field coil by means of a field current detecting resistor to restrict the current to a predetermined value in correspondence to the detection result, wherein:

said field current detecting resistor is a thick film printed resistor; and each of said means other than said thick film printed resistor is an electronic circuit configured in the form of an integrated circuit.

Dependent claims 2-4 are considered allowable by their respective dependence on allowed independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sec PTO-892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pedro J. Cuevas whose telephone number is (703) 308-4904. The examiner can normally be reached on M-F from 8:30 - 6:00.

Application/Control Number: 09/831,040

Page 4

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Nestor R. Ramírez can be reached on (703) 308-1371. The fax phone numbers for

the organization where this application or proceeding is assigned are (703) 305-3432 for regular

communications and (703) 305-3432 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703) 308-0956.
